

Woodstock Chimes® Synergy

All Woodstock Chimes are precision tuned by a process that is unique in our industry. We use a sophisticated digital analysis that is hundreds of times more sensitive than the human ear. This equipment is part of a climate-controlled tuning environment, which insures very high quality. In fact, we are the only wind chime company that offers a lifetime tuning guarantee.

This is why all of our chimes sound great together. We have found that many of our customers collect chimes and often ask for recommendations of chimes to combine. The following list is our suggestion of significant combinations that have connections musically and/or culturally.

D-Major Scale
